Recommendation Letter for Mr. Qizhi Guo

Dear Admissions Officer,

With great pleasure, I am writing this letter in support one of my favorite students Mr. Qizhi Guo's master degree application to your esteemed university. As his academic teacher of Detection Technology, I became acquainted with him in March 2020 whom I have known as a hardworking and conscientious student that I would like to share with you.

In my classes, Qizhi showed an excellent performance. With strong learning ability, he was able to understand the knowledge about the modern intelligent detection technology, near infrared spectroscopy and hyperspectral imaging technology, as well as multi-sensor information fusion and remote intelligent monitoring technology, etc. quicker than his fellows, which could be seen from the test scores. In particular, out of great passion in camera and photography, he could detailedly introduce the working principles of charge-coupled device, which exposed the great efforts he paid in his interested aspect and meanwhile displayed his wonderful self-study ability and inquiring mind.

Besides, his conscientious attitude was also displayed in his proactivity to refer to extensive materials, especially the English literature to enrich his knowledge reserve. More importantly, he would summarize the key points to lay the groundwork to his later study. What he possessed, I am confident, will be conducive to his advanced study.

Based on the above particulars, when he came to ask me to be his referee, I agreed with him without hesitation. I believe he will perform very well as in our university. With solid professional foundation, aggressive attitude and strong thirst for knowledge, I am sure he will be a qualified asset for your university. Thus, please give him a favorable consideration for his application. If any more information is in need, please feel free to contact me.

Kind regards,

Wei Wang

Associate Professor of China Agricultural University
